

REF.: 2681

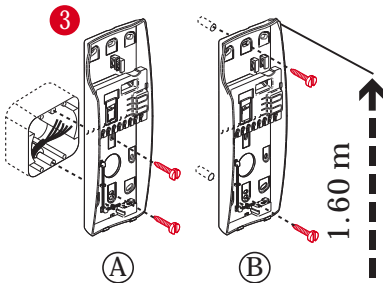

Description and operation

Additional Telephone for a second communication point in a 2 wires audio kit installation. The call arrives at both sets. When the main telephone is picked up, communication is established with the outdoor unit. However, when the Additional telephone is picked up, it has priority and it establishes communication with the outdoor unit, whether the kit telephone is picked up or not. The door can be opened (latch button ) and the volume of the chimes adjusted from either of the telephones.

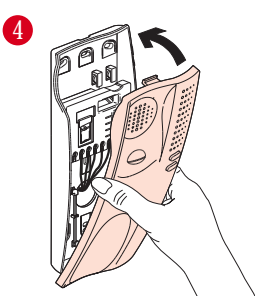

Mounting

Opening the telephone

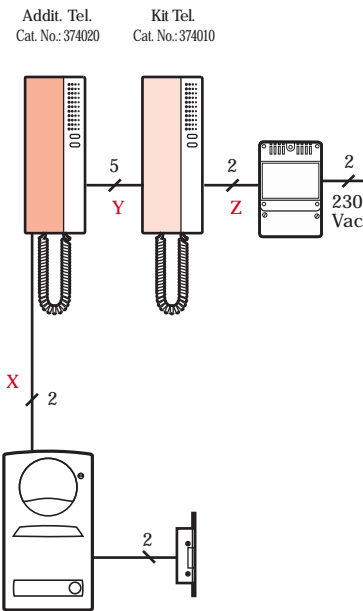

Fixing on to the universal box or wall  
at the recommended height

Closing the telephone

Single wire diagram

Recommended cross-sections

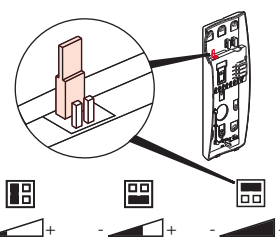

Connections		Addit. T. 	Kit T. 	Number of wires	Minimum cross-sections (mm <sup>2</sup> )		
					25 m	50 m	100 m
4, 5				2	-	0.25	0.5
3, 9V, 10M				3	-	0.5	1
9, 10				2	0.5	1	2.5

Connections		Addit. T. 	Kit T. 	Number of wires	Minimum cross-sections (mm <sup>2</sup> )	
					X+Y+Z 50 m	X+Y+Z 100 m
V, M				2	0.5	1

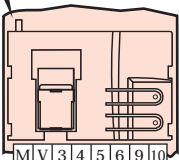

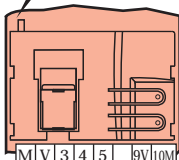

Installation diagram
